Conventions used in this corrigendum: Original, unchanged text is in normal font; deleted text is struck through e.g., deleted text and inserted text is underlined e.g., inserted text.

1) Clause 12.4.1.4

If the simple type definition has a whiteSpace facet with the value preserve or replace, then the enumerated type shall be assigned at least one final TEXT encoding instruction with qualifying information indicating one or more of the "EnumerationItem"s, and without "TextToBeUsed".

NOTE – An important example of this is a restriction of xsd:string with an enumeration facet, which has whiteSpace preserve by default.
