RECTIFICATIF TECHNIQUE 2

Technical Corrigendum 2 to ISO/IEC 9594-6:2005 was prepared by Joint Technical Committee ISO/IEC JTC 1, Information technology, Subcommittee SC 6, Telecommunications and information exchange between systems, in collaboration with ITU-T. The identical text is published as ITU-T Rec. X.520 (2005)/Cor.2 (11/2008).
1) Correction of the defects reported in defect report 325
   a) Change second paragraph of 5.7.1 as shown:

   An attribute value for Telephone Number is a string that shall comply with the internationally agreed format for showing international telephone numbers, as indicated in 2.5 of ITU-T Rec. E.123 (e.g., +44 582 101010). However, it is allowed to insert hyphens (–), in addition to the + sign, spaces and figures. Other characters from the PrintableString repertoire shall not be used.

   b) Delete 6.6.3 and remove the reference to that subclause in 6.6, 7.2.8 and 7.2.9.

2) Correction of the defects reported in defect report 327
   a) In subclause 7.1.1, delete the 2nd paragraph.

   b) To the paragraph just before the ASN.1 for Case Ignore Match, add:

   After taking white space into account, caseless matching shall be performed by performing case folding, as described in The Unicode Standard, and applying Normalization Form D or Form KC, as described in Unicode Technical Report 15, depending on the character repertoire commonly examined and performance requirements.
