Technologies de l'information — Architecture de document ouverte (ODA) et format de transfert: Structures de documents

RECTIFICATIF TECHNIQUE 2

Technical Corrigendum 2 to International Standard ISO/IEC 8613-2:1995 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*.

INTERNATIONAL STANDARD

ITU-T RECOMMENDATION

**INFORMATION TECHNOLOGY – OPEN DOCUMENT ARCHITECTURE (ODA)
AND INTERCHANGE FORMAT: DOCUMENT STRUCTURES**

TECHNICAL CORRIGENDUM 1

1) Subclause 9.4.3.4

Under Default value, replace Such that edge losses are minimized *by* See 11.3.2.

2) Subclause 11.3.2

Replace the second to last paragraph by:

In the case that this Specification does not define an assured reproduction area for a nominal page, then the assured reproduction area position and dimensions are determined from the document profile attribute “assured reproduction areas”.

3) Subclause 11.3.3

Replace the last paragraph by:

For other page sizes, the dimensions of the assured reproduction area and its position on the nominal page shall be defined by the attribute “assured reproduction areas” in the document profile. If the value of this attribute does not contain an entry corresponding to a given nominal page size, then the dimensions of the assured reproduction area for that nominal page size are considered to be equal to those of the nominal page, and its position is considered to be such that its top left corner is coincident with that of the nominal page.
