TECHNICAL CORRIGENDUM 2

1)   Subclause 7.14

After the text:

```
CIE-Colour   ::=  SET {
  x-value       [0]  Real-Or-Int,
  y-value       [1]  Real-Or-Int,
  z-value       [2]  Real-Or-Int }
```

add the following lines:

```
        -- for CIELUV,    x-value = L*,
        --                y-value = u*, and
        --                z-value = v*;
        -- for CIELAB,    x-value = L*,
        --                y-value = a*, and
        --                z-value = b*
```

2)   Subclause E.1

Delete the last two sentences in Note 2: However, several non-semantic ODA attributes … beginning the comment with **"URC:"** or **"UVN:"**).

3)   Subclause E.2.2.6

Delete the last three sentences in the Note: If not, then some implementation-specific derivation … where **"UVN:"** is the convention.

4)   Subclause E.4.5.1

Replace the current text by:

E.4.5.1 User-readable comments

This attribute is declared as:

```
        urcmnt   CDATA   #IMPLIED
```

5)   Subclause E.4.5.3

Replace the current text by:

E.4.5.3 User-visible name

The user-visible name for an object class is normally represented as the generic identifier of the objects that are instances of the class (see E.2.2.6). The user-visible name for an object is normally represented as the unique identifier of the object (see E.2.2.7).

When this is not the case, the user-visible name may be specified as the value of an attribute that is declared as follows:

> **uvnm   CDATA   #IMPLIED**

The ODL attribute **"uvnm"** may also be used for specifying the user-visible name for a style.

6)   Subclause E.4.5.4

Add the following text at the end of the subclause:

Thus, a binding name is normally represented as an attribute name that is not the same as any attribute name defined in this annex. When this is not the case, the mapping between binding names and their corresponding attribute names may be specified as the value of an attribute that is declared as follows:

> **bindname   NAMES   #IMPLIED**

The attribute value consists of pairs of attribute names and entity names, where the entity text contains the binding name that corresponds to the attribute name.

7)   Subclause E.7.6.1

Replace the line:

> **appcmnt   ENTITY   #IMPLIED**   *-- application comments --*

by:

> **urcmnt   CDATA   #IMPLIED**   *-- user-readable comments --*
> **appcmnt   ENTITY   #IMPLIED**   *-- application comments --*
> **uvnm   CDATA   #IMPLIED**   *-- user-visible name --*

8)   Subclause E.10.2.2

Replace each of the 5 occurrences of the line:

> **appcmnt   ENTITY   #IMPLIED**   *-- application comments --*

by:

> **bindname   NAMES   #IMPLIED**   *-- binding names --*
> **urcmnt   CDATA   #IMPLIED**   *-- user-readable comments --*
> **appcmnt   ENTITY   #IMPLIED**   *-- application comments --*
> **uvnm   CDATA   #IMPLIED**   *-- user-visible name --*

9)   Subclause E.11.3.1

Replace each of the 2 occurrences of the line:

> **protect   NAME   unprot**   *-- protection: PROTECT UNPROT --*

by:

> **bindname   NAMES   #IMPLIED**   *-- binding names --*
> **urcmnt   CDATA   #IMPLIED**   *-- user-readable comments --*
> **uvnm   CDATA   #IMPLIED**   *-- user-visible name --*
> **protect   NAME   unprot**   *-- protection: PROTECT UNPROT --*

10)   Subclause E.11.3.2

Replace each of the 5 occurrences of the line:

> **id   ID   #IMPLIED**   *-- object identifier --*

by:

> **id   ID   #IMPLIED**   *-- object identifier --*
> **bindname   NAMES   #IMPLIED**   *-- binding names --*
> **urcmnt   CDATA   #IMPLIED**   *-- user-readable comments --*
> **uvnm   CDATA   #IMPLIED**   *-- user-visible name --*
