HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES –  
Part 2-76: Particular requirements for electric fence energizers

**CORRIGENDUM 1**

**3 Terms and definitions**

**3.8 Definitions relating to miscellaneous matters**

**3.8.101**  
**standard load**

*Replace the term definition:*

load consisting of a a non-inductive resistor of  $500 \Omega \pm 2,5 \Omega$  and a variable resistor that is adjusted so as to maximize the energy per impulse or **output current** in the  $500 \Omega$  resistor, as applicable

*By:*

load consisting of a non-inductive resistor of  $500 \Omega \pm 2,5 \Omega$  and a variable resistor that is adjusted so as to maximize for

- **energy limited energizers**, the energy per impulse in the  $500 \Omega$  resistor;
- **current limited energizers**, the **output current** in the  $500 \Omega$  resistor.
