**INTERNATIONAL ELECTROTECHNICAL COMMISSION**

**TO ALL NATIONAL COMMITTEES**

**New IEC on line service for downloading revisable FDISs (like already available for CDVs)**

Dear Sir/Madam,

The IEC Central Office is pleased to announce the implementation of a new feature for the IEC information system.

The Standardization Management Board requested the IEC Central Office to align the process for registering text for FDIS translation with that currently used for CDVs. It was possible to download the revisable files for the CDVs circulated; this is now extended to the FDISs.

A new Web page (accessible via "NewDocs") and a weekly newsletter have been developed, to replace the existing e-mails sent by the IEC at the submission of the final texts by the secretary of TC/SCs. Access to these functions is restricted by specific permissions, which will be granted by the IEC Sales department ([sales@iec.ch](mailto:sales@iec.ch)). This access is similar to the access to revisable CDVs.

Yours faithfully,

F.W.P. Vreeswijk  
General Secretary & CEO
