

**TO ALL NATIONAL COMMITTEES
TO THE CHAIRMEN AND SECRETARIES OF TECHNICAL COMMITTEES AND
SUBCOMMITTEES**

Dear Sir/Madam,

Change in the designation of document filenames on the IEC document server

Following requests from a number of National Committees concerning the designation of document filenames on the IEC document server, these will be modified to include the document type in the filename.

With immediate effect files loaded from the IEC document server will have the document type suffixed to the existing filename. Filenames will be of the form:

Committee-number_language(_supplement)_document-type.file-extension

For example: 23E_470e_FDIS.pdf

The new file designation will apply immediately to all database searches and will be applicable to document lists (for example newdocs and MyIEC) as these are regenerated in the next few days. The new filenames will not be applicable to existing document lists that you may have stored locally.

Yours faithfully,

**A. AMIT
General Secretary**
